

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

the city of Moscow. No deaths. One death occurred 10 miles from Moscow, near Johnson, Whitman County, Wash., just across State line. About 1,400 vaccinations have been made in this county in past two months. Wherever I have had authority I have rigidly enforced quarantine rules with most happy results. Have enforced vaccination as far as I could, but we are not backed by law, and I find quite some resistance in this matter.

The disease has been of a most mild nature even in those not protected by vaccination—nearly all cases a mild discrete form. Great difficulty has been encountered in convincing the laity that the disease is genuine variola. In the past week 3 new cases have occurred at Kendrick, a town of this county 25 miles from Moscow. Twenty-two cases all told have occurred at Kendrick, as I am informed by resident physicians of that place. Kendrick's population, about 600. No quarantine enforced there until I instituted it, since when the disease has rapidly decreased.

Respectfully submitted, W. W. WATKINS, M. D.,
Health Officer Latah County, Idaho, and city of Moscow.

Smallpox in the United States as reported to the Surgeon-General United States Marine-Hospital Service, June 30 to November 3, 1899.

[For reports received from January 1 to June 30, 1899, see PUBLIC HEALTH REPORTS for June 30.]
